In the course of studies
*Computer Science*

For the degree of
*Bachelor of Science*

Technical University of Cologne
Faculty of Computer Science and Engineering

First supervisor:   Prof. Dr. Heinrich Klocke
Technical University of Cologne

Second supervisor:   Prof. Dr. Fotios Giannakopoulos
Technical University of Cologne

Overath, July 2019

1. Introduction

2. Current methods for abstaining

2.1 ROC based methods

2.2 Cost curves

3. Proposed method based on a reward function

4. Experiments

5. Coclusion

Appendix
